Black Carbon cloud over the country

3263. SHRIMATI JAYA BACHCHAN: Will the PRIME MINISTER be pleased to state:

whether it is a fact that scientists have warned that Black Carbon cloud over the country rings alarm bells; and

if so, the steps Government has taken to end continued dependence on coal based power plants and growing vehicular pollution, which has pushed the country towards an inevitable climatic catastrophe?

THE MINISTER OF STATE IN THE MINISTRY OF ENVIRONMENT AND FORESTS (SHRI NAMO NARAIN MEENA): (a) The Atmospheric Brown Cloud (ABC) refers to the high loading of pollutants in the atmosphere consisting of mixture of anthropogenic sulphate, nitrate, organics, black carbon, dust and fly ash particles and natural aerosols such as sea salt and mineral dust.

The exact impacts of pollutant loading over monsoon rain and agriculture are still under study and the International program on Atmospheric Brown Cloud has been initiated by the world community to understand such impacts.

(b) Considering the fact that coal is to remain mainstay for generation of electricity in India in short to medium term perspective, new plants are being encouraged to adopt more efficient and clean coal technologies. Besides, 1,50,000 MW hydro initiative has been launched to achieve the objective of full hydro potential. Non Conventional Energy sources are also being encouraged and 11,125 M W out of total installed capacity of 1,43,061 M W in the country is contributed by renewables. Measures have also been taken to improve the air quality and reduce the pollutant loading *e.g.* introduction of tightened emission norms for vehicle, improvement in fuel quality in transport sector, use of cleaner fuels, introduction of electrostatic precipitators in thermal power plants, introduction of biogas plants and improved cookers in rural sector etc.

Tiger protection projects

3264. SHRI RAMA CHANDRA KHUNTIA: Will the PRIME MINISTER be pleased to state:

the reasons for drastic reduction of tiger population in India;

the total number of National Park where tiger protection projects are implemented;

the total budget and expenditure in these projects for last ten years; and

the action that has been taken against these officers concerned?

THE MINISTER OF STATE IN THE MINISTRY OF ENVIRONMENT AND FORESTS (SHRI S. REGUPATHY): (a) The main reasons for tiger decline in areas outside tiger reserves/ protected areas, as seen in the findings of the recent, refined country level estimation, are as below:

(i) Degradation of forest status outside Protected Areas/Tiger Reserves owing to:

(a) human pressure

(b) livestock pressure

(c) ecologically unsustainable land uses

(ii) Loss of forest quality in terms of prey biomass

(iii) Tiger deaths due to poaching

(iv) Tiger deaths due to man-animal conflict

(v) Fragmentation leading to loss of gene flow from source populations

(vi) Loss of reproduction owing to disturbance on account of heavily used infrastructure like highways, etc.

(vii) Lack of adequate protection in outside areas

(viii) Insurgency/law and order problems

At present, there are 28 Tiger Reserves spread over 17 tiger States where the Project Tiger Scheme is being implemented. During the current plan period, the Centrally Sponsored Scheme of Project Tiger has been extended to 8 new Tiger Reserves in seven tiger States.

The plan period-wise allocation and tiger reserve-wise release of fund during the last 10 years are given at the statement *(See* below).

The recent assessment of tiger population is based on determining spatial occupancy of tigers throughout potential tiger forests and sampling such forests using camera traps in a statistical framework. This assessment is not comparable to the earlier total count using pugmarks owing to several shortcomings in the latter. The new findings indicate a poor status of tiger population in areas outside tiger reserves and protected areas. The tiger population, by and large, in tiger reserves and protected areas of tiger States are viable, while requiring ongoing conservation efforts. The general decline of tiger status is discernable outside the Tiger Reserves/Protected Areas in such States, owing to various causative factors as indicated, which are beyond the control of officers in-charge of tiger reserves.

Statement

Release of funds to Tiger Reserve under Project Tiger Scheme during Ninth Plan and Tenth Plan

Allocation during Ninth ***Plan***—/fa.75 *crores*

(Rs. in lakhs)

Scheme to inculcate environment awareness

3265. SHRI SHANTARAM LAXMAN NAIK: Will the PRIME MINISTER be pleased to state:

(a) whether Government has any scheme to inculcate environment awareness among the members of public and students in particulars;

(b) the essential features of the scheme;

whether the scheme is implemented in the State of Goa; and

details thereof?

THE MINISTER OF STATE IN THE MINISTRY OF ENVIRONMENTAL FORESTS (SHRI NAMO NARAIN MEENA): (a) and (b) The Scheme on "Environment Education, Awareness and Training" implemented by the Ministry involves activities/programmes such as:

(i) National Green Corps Programme;

(ii) National Environment Awareness Campaign (NEAC);

(iii) Seminar/Symposia/Workshops; and

(iv) Environment Appreciation Courses, etc.

(c) and (d) Under the Scheme indicated in reply to parts (a) & (b) above an amount of Rs. 13,23,190/- was released during 2007-08 to support 500 Eco-clubs in the State of Goa under the National Green Corps Programme. Further, grants of Rs. 26,000/- and Rs. 10,000/-
